

## Want To Know If Your Water Is Safe ?

People's Science Institute offers services designed to monitor the safety of the water that is used in homes, institutions and businesses.

These services include testing water for bacterial and chemical contamination in:

- Drinking Water Supply
- Filtered Water
- Wells/streams
- Swimming pools, etc.

Our services are available directly to:

- Private individuals,
- Schools,
- Businesses/Government & Non-Government organizations.

Please call us for more information

0135-2971954, 2971955

## Be Sure Before Drinking Water

## Water Testing A Direct Service to the Community

PSI's water testing kit is a scientific tool that enables institutions/ organizations to regularly test water quality. It will keep everyone healthy and ultimately save lives.

## Water Testing Services For Your Home, School or Business

PSI offers 3 types of water testing kits. Its Comprehensive Water Quality Testing (CWQT) Kit includes 13 parameters required for testing surface water quality.

The Drinking Water Quality (DWQT) Kit includes 10 parameters for testing ground water quality and the Domestic kit can test for pH, bacterial contamination, chloride and residual chlorine.

The kits are compact, portable and can test 40 samples of water. Tests for specific parameters can be added at user's request

## The Following Water Tests Are Offered.

1. Fecal Coliform (presence/absence, 24 hour test)
2. Hardness
3. Alkalinity
4. Chlorides
5. Nitrates
6. Fluorides
7. Dissolved Oxygen
8. Phosphates
9. Transparency
10. Temperature
11. Residual Chlorine
12. Iron
13. pH

All tests are standardized and based on APHA\* standard methods.  
Tests validated by SHRIRAM INSTITUTE  
\*APHA: American public health Association

## User Friendly, Low Cost and Reliable Kits

All tests are simple to perform with step by step user instructions given in the manual. Gives a reliable scientific experience.

### Reasonable cost!

CWQT kit Rs. 6500/-

DWQT kit Rs. 6000/-

Domestic kit Rs. 2000/-

(Rs. 800 extra per kit for packaging and transportation of outstation delivery.  
The reagents can be refilled at nominal charges.
